

Games! With Javascript and Block Coding

To Begin, click on the link!

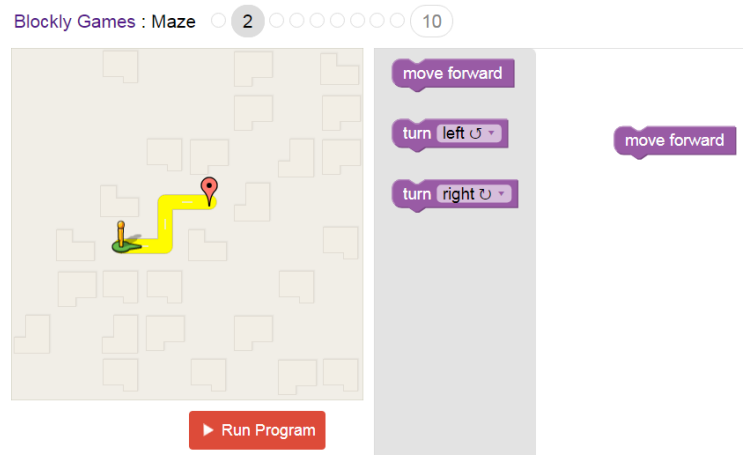

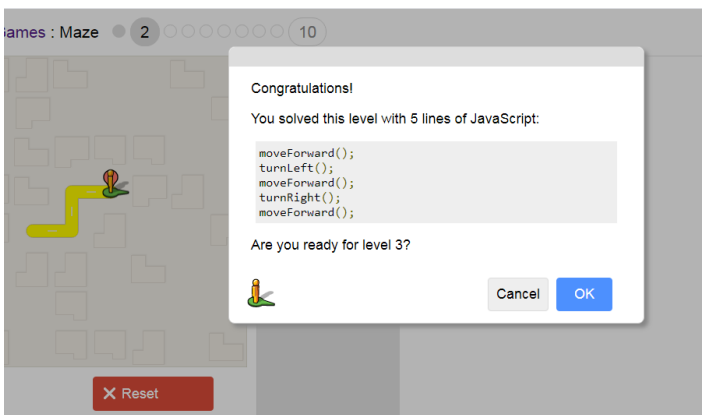

<https://blockly.games/>

This week, try out these games.

- Start with the **Puzzle** game, and work your way through all 4 games to **Turtle** for some great brain building challenges!
- Each Puzzle will have clues and instructions for you to follow. Once you complete the challenge, continue on to the next level.

- By clicking and dragging blocks, and using your brain powers, you can build your coding skills.

- As you work through the puzzles, you can read the javascript code that you used. Pretty neat, huh?
- For even more fun, try the challenges with a friend or someone in your family, and see who can find the solution the quickest!
