

# Code Your Hero

Click on the link to get started!

<https://csfirst.withgoogle.com/c/cs-first/en/code-your-hero/code-your-hero/introduction-from-hero-to-superhero.html>

- Click on the **Video** and watch the short introduction. Once you have watched the video, you're ready to create your own project!

### Instructions

[Para hacer esta actividad en español, haz clic aquí.](#)

**Students**

1. Watch the introduction video.
2. Open the starter project link and choose a sprite for your hero.
3. Return to this page and watch more videos below.

**Teachers**

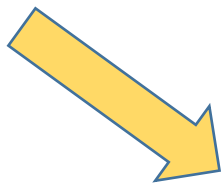

1. Visit the [Hour of Code teacher resource page](#) for instructions.

### Links

[Starter Project](#)

- Next, click on the **Starter Project** to begin
- Once you have chosen your sprite, and started coding, continue the story by trying out an **Add-on**

## Now It's Your Turn:

1. Open the Starter Project in Scratch.
2. Choose a sprite for your hero.
3. Add **say** for **seconds** blocks.
4. Start your code with a **when clicked** event.
5. Build on your project with "Move Your Hero", or try any video you like.

4:19 / 4:19

### Choose an Add-On

<b>START HERE</b>  Move Your Hero Make your hero move up and down when arrow keys are pressed.	 Fly Over Buildings Program buildings to move across the screen, so your hero appears to fly.
 Add Background Music Set the scene for your hero by adding sound to your project.	 Show Off with a Super Spin Help your hero do great things with this spinning move.
 Keep Score Create a game by programming your hero to collect objects.	 Support Your Hero Add another character to help your hero.
