The State of 223 S. Main: Future Building Needs

The Plymouth District Library has tackled an ambitious plan of building maintenance and systems replacement over the last several years. Since 2014, the following building components have been replaced:

- Roof
- Heating, Ventilation, Air Conditioning systems
- Entrance stairs, ramp and snow-melt system
- LED conversion of exterior lighting

With the vast majority of the expense associated with these building upgrades was covered by the Library’s designated building fund, a commitment made by the Library’s Board of Trustees when the building opened in 1998. “The foresight of the trustees was a tremendous gift to the community,” explained Carol Souchock, Library Director. “We were able to make major repairs without closing the building or going to the citizens for additional funding.” In addition to use of the building fund, the Library often secures alternative funding sources, such as grants, gifts and contributions.

Even with preventative maintenance and cleaning, the almost 1,000 Library visitors each day do contribute to the general wear and tear on the building. Looking forward, a number of building and mechanical features will need replacement over the coming decade. These include:

- Elevators
- Windows
- LED Lighting Conversion
- Carpet
