

E-BOOK CLUB KITS

Foklorn by Angela Mi Young Hur

SUMMARY

Elsa Park is a physicist at the top of her game, stationed at an international observatory in Antarctica thousands of miles from ghosts that have haunted her family her entire life. But even the South Pole can't prevent her childhood imaginary friend from finding her. The reappearance of this ghostly apparition signals that the curse her mother told her afflicted the women of their line—who were doomed to repeat the narrative lives of their ancestors from Korean folklore, and whose story Elsa has tried desperately to outrun—is finally catching up to her.
